

LEED Green Associate Exam Prep Course

Stay competitive in the marketplace with USGBC's newest professional credential – LEED Green Associate. Passing the Green Associate exam will allow you to market your knowledge of the preeminent standards of the green building industry, and it is the first step in new LEED tiered credentials.

This course includes 12 hours of instruction in a classroom setting. This series of 4-hour sessions provides in-depth information on all of the LEED Rating systems and the overall concepts of sustainable building, green building definitions and terminology, interactive case studies, practice exam questions and time for student questions.

Upon completion of this twelve-hour course you will receive a certificate of completion which can be uploaded onto the GBCI website to meet the LEED Green Associate requirements. Space is limited, register early!
