

Elftmann Student Success Center

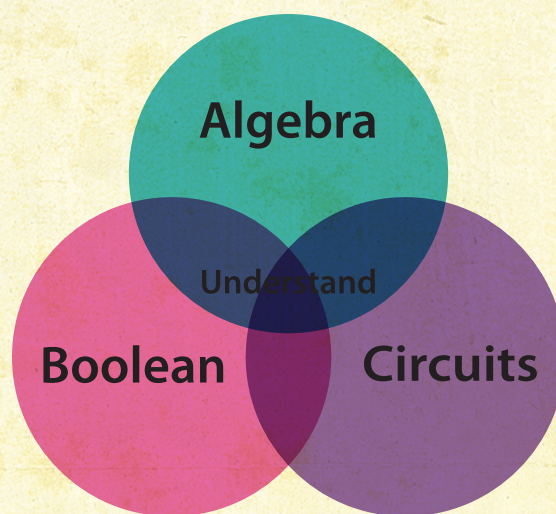

The Math Center

Basic Study Tips For Any Math Class

- **Attend every class session.** Math is a symbolic language and uses knowledge learned from the day before to continue to learn new information. Each lesson is built on what you learned previously. **SO DON'T MISS CLASS!**
- **Do your homework daily; don't get behind.** Schedule 1-2 hours per day for math homework. Because math is a language; it requires a lot of practice to acquire understanding and expertise. Remember, if you don't use it you will lose it.
- **Study for a weekly test several days in advance.** Work through practice tests at the end of the book's chapters. Work the same type of problem 3-5 times over to focus in on the process (steps). Remember, only the numbers change; the process (steps) that you use for a type of problem stays the same. Practice, practice... practice!
- **Taking a math test,** give yourself a minute to relax and look at each page of the test first. Begin with problems that you know best and fan out. You will write a better test if you do this.

Visit the Math Center in the Elftmann Student Success Center in Black 52

- Get the help you need:
- Guided study
- Math tutoring
- Math tip sheets
- Technical video library and more!

It's fun, when you understand!
