The Program
The Sewing & Production Specialist program provides students with the entry level skills necessary to operate sewing machines and tools associated with this industry. It also provides the theoretical knowledge that relates to the process of manufacturing in the contract sewing industry. Graduates from this program are exposed to many types and grades of materials such as leather, canvas, fur, fine fabrics & vinyl. Students practice safety and ergonomics required in the workplace. This program is approved by the Department of Labor & Industry as “The Makers Coalition Apprenticeship” Program. Students attend class 2-3 nights a week.

Course #  Course Name
SPSC0100  Math & Measuring
SPSC0110  Cut and Sew Safety & Ergonomics
SPSC0105  Introduction to Sewing and the Process of Production
SPSC0115  Materials & Handling Methods for Sewing Manufacturers
SPSC0120  Basic Sewing Techniques
SPSC0125  Sewing Equipment & Operation (Industry Rotation)
SPSC0135  Sewing & Production Elective
  • Upholstery
  • Alterations
  • Machine Mechanic
